DIBYARANJAN NAYAK

Entry-Level Data Analyst | Excel | SQL | Power BI | Google Sheets
Bhubaneswar, Odisha, India | +91 9348026657 | LinkedIn: linkedin.com/in/dibyaranjan-nayak-348357292

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering graduate (80%) with practical, project-based experience in Excel, SQL, Google Sheets, and Power BI. Skilled in data cleaning, business analysis, and building interactive dashboards to turn raw data into clear insights. Seeking an entry-level Data Analyst, MIS, or Reporting Analyst role to apply hands-on analytical and reporting skills.

TECHNICAL SKILLS

Microsoft Excel: Data Cleaning, Data Validation, Sorting & Filtering, Conditional Formatting, Lookup Functions, Pivot Tables, Dashboard Creation

SQL: SELECT, WHERE, GROUP BY, ORDER BY, Aggregate Functions, CASE WHEN, JOINs, Data Filtering & Aggregation, Business Analysis Queries

Power BI: Data Cleaning & Transformation, Data Modeling, DAX, Measures, Calculated Columns, KPI Cards, Interactive Dashboards, Data Visualization

Google Sheets: Data Organization, Data Cleaning, Formulas, Filtering, Analysis, Reporting

PROJECTS

Category-City Wise Sales Analysis | *Microsoft Excel*

- Cleaned and organized raw sales data using Excel to prepare it for accurate category-wise and city-wise analysis.
- Built Pivot Tables and applied Excel formulas to summarize sales performance across product categories and cities.
- Analyzed sales patterns to identify category and city-level trends, presenting findings in an organized, easy-to-read format.

Online Book Store Analysis | *SQL / MySQL*

- Wrote SQL queries using SELECT, WHERE, GROUP BY, and ORDER BY to filter and analyze relational book store data.
- Applied aggregate functions and JOINs to combine data across tables and extract business-relevant insights.
- Performed data filtering and aggregation to answer business questions about sales and inventory patterns.

QuickBites – Online Food Delivery Analysis | *Power BI*

- Cleaned and modeled online food delivery data in Power BI, using DAX to build measures and calculated columns for key metrics.
- Developed an interactive dashboard with KPI cards tracking Revenue (₹656.21K), Total Orders (900), Cancellation Rate (25.56%), Average Rating (3.73), and Average Order Value (₹979).
- Identified revenue drops in March and June with recovery in July and August, and found Fast Food as the top revenue category versus Cafe as the weakest.
- Analyzed customer segments and found repeat customers generated ₹564.7K in revenue versus ₹91.5K from new customers; also identified April as the peak cancellation month at ~31.93%.

EDUCATION

B.Tech, Computer Science and Engineering
GITA Autonomous College, Bhubaneswar | Nov 2022 – Apr 2026 | 80%

Class XII – Science
Ramarani Higher Secondary School of Science and Technology, Balasore | 2020 – 2022 | 84%
